

KVS Information Systems, Inc.

Total Solutions For Government

ACCOUNTS RECEIVABLE

The **KVS Accounts Receivable** system is a comprehensive miscellaneous municipal billing system. With full integration to the **KVS Collections System**, billing and collection activities are created, maintained and reported upon.

For use in a Centralized or Decentralized environment, this system systematically forecasts billing and projected revenues.

The Accounts Receivable System produces laser printed invoices and statements, all customer activities as well as aging, paid/unpaid reporting.
