

## **NEW** REMOTE BACKUP STORAGE

Remote backup storage solutions, or online backups, are quickly becoming the new standard for off-site backup storage, providing an additional level of data redundancy while maintaining data integrity and security.

The **KVS Remote Backup Storage Solution** is designed as a premier online storage solution for your critical KVS data. With this service, after your normal nightly backup completes, another job is run to transfer your KVS data to our secure ftp server over your high speed internet connection. Once on our system, customer data will be backed up to tape as part of our normal backup rotation, providing:

Daily Backups for 2 Weeks  
Weekly Backups for 1 Month  
Monthly Backups for 1 Year

At any time, clients will have immediate access to their most current backup online. Our support staff is available to assist you in restoring from previous backups.

This service is intended to complement your current backup procedures, providing you with an additional layer of redundancy for your most critical data.

Initial Setup Cost: \$250  
Annual Service Cost: \$1,200  
(billed quarterly or annually with Software Subscription Service)

### **ADDITIONAL OFFSITE STORAGE**

### **AUTOMATED TRANSFER**

### **UTILIZES HIGHSPEED INTERNET CONNECTION**
