

# KVS Information Systems, Inc.

*Total Solutions For Government*

## **Vehicle & Equipment Maintenance**

The **KVS Vehicle & Equipment Maintenance** system is designed to record, maintain and report municipal costs associated with vehicles and all other equipment. The system is used to schedule and assign preventative and remedial maintenance for all pre-selected vehicles and equipment.

The system may be used in a centralized or decentralized, stand-alone or multi-user environment.

*Providing Solutions To Fit Your Needs*
